

Project Design Phase
Proposed Solution Template

Date	18 june 2026
Team ID	Individual project
Project Name	Complaint Ease: Online Complaint Registrations and Management System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many organizations, colleges, and service providers rely on manual complaint handling systems, resulting in delayed responses, lack of transparency, poor complaint tracking, and inefficient resolution. Users cannot easily monitor the status of their complaints, while administrators face difficulties in managing and prioritizing complaints effectively.
2.	Idea / Solution description	Complaint Ease is a MERN Stack-based web application that enables users to register complaints online, upload supporting documents, track complaint status in real time, and receive notifications regarding progress. Administrators can view, assign, update, and resolve complaints through a centralized dashboard while maintaining complete complaint records and reports.
3.	Novelty / Uniqueness	The system provides a centralized complaint management platform with real-time status tracking, complaint categorization, document upload support, secure authentication, and automated notifications. Unlike traditional manual systems, it offers transparency, accountability, and easy access for both users and administrators.
4.	Social Impact / Customer Satisfaction	The solution improves transparency in complaint handling, reduces response time, increases user satisfaction, and enhances trust between users and organizations. It promotes efficient grievance redressal and contributes to better service quality and accountability.
5.	Business Model (Revenue Model)	The application can be offered as a Software-as-a-Service (SaaS) solution to educational institutions, companies, government offices, and organizations through subscription plans. Additional revenue can be generated through premium analytics, customized dashboards, and maintenance services.

6.	Scalability of the Solution	The MERN Stack architecture supports scalability and can accommodate a growing number of users and complaints. The system can be expanded to support multiple organizations, mobile applications, AI-based complaint categorization, multilingual support, and advanced analytics in future versions.
